

H & V Blower-Coil Units Horizontal and Vertical

H & V Blower-Coil Units: The best in horizontal and vertical belt-drive designs

Owners

An extensive variety of components provide a flexible and versatile blower-coil unit to meet the needs of your building. Plus, the variety of options available with H and V units is where you find the versatility to fit any Heating, Ventilating, and Air-Conditioning (HVAC) need for your facility.

Options include:

- Mixing boxes with low-leak dampers
- High-efficiency filter sections for 2" pre-filter and 4" final filter
- Blow-through electric heat with a single-point-power connection

Designers

H horizontal and V vertical units are designed to maximize selection flexibility and installation, making them versatile enough to fit any HVAC design need. And the units are designed to exceed the stringent quality standards of the institutional market, while remaining cost-competitive in the light-commercial segment. H and V blower-coil units set the new standard for quality, flexibility, and competitive pricing.

Contractors

Units are shipped completely assembled, reducing field-installation time and labor. High-efficiency motors, starters, disconnects, and fusing mean easier coordination between the mechanical and electrical trades.

All units, with or without electric heat, are cETL listed and labeled. All wiring is in compliance with NEC, ensuring safety and quality for the owner.
